

---

```
git config --global user.name "Mikael Roos"
git config --global user.email "mos@dbwebb.se"
git config --list
```

---

---

```
mkdir hello ELLER använd exist.
```

---

---

```
cd hello (finns redan)
git init
```

---

---

```
skapar filer:
touch hello.php
touch README.md
```

---

---

```
git add . adderar filer
git status vad är adderat men ej "tagit"
git commit -m "Initial commit" lägger i repositorit
```

---
